

At **FunctionOne** we believe in providing small businesses with the same level of IT support large corporations typically enjoy – but at a price they can afford!

Our **We Are IT Program** delivers on that belief by providing your business with a complete IT department for less than the cost of a single full-time hire. We are your desktop admins, your network engineers, your CIO. But more importantly, we are your IT Partner.

We operate at all levels of your business, from server room to board room, taking ownership of your IT infrastructure and working with you to align your IT strategy with your business goals.

## Key Program Benefits

### **Peace of Mind**

Leave the fire-fighting to us. Let us be your network watchdog, allowing you to focus on your core business and revenue generating activities while we deal with the hackers and blue screens of death.

### **Increased Productivity**

24x7 monitoring provides visibility into your network allowing us to immediately determine the root cause of any network issue, and reduce the task of issue diagnosis from hours to mere minutes — resulting in substantial cost savings and downtime reduction.

### **Cost Savings**

For less than the cost of a single new hire you can have access to our network operations center, our Enterprise-Ready RemoteServices toolset and our experienced team of engineers, all without the added HR headache.

### **End-User Support & Training**

Through our RemoteServices toolset we can provide your end-users with top-notch support anywhere in the world. But we're not averse to getting physical. If you need us onsite once a week, or every day, we can provide you with the level of support coverage your business needs at a price that won't break the bank.

### **A Safe & Secure Network**

Firewalls, antivirus, spyware, patch management and general security performance service monitoring ensures that your network's integrity is an ongoing priority and that your security investment is working.

And all of this without the added HR headache. We've got you covered!
